

MixMatters is an innovative project offering an integrated solution for the efficient valorisation of mixed biologically based waste. With a modular separation unit and a tailored valorisation hub, we truly believe in our innovative game-changing approach. Over the course of three demonstrations in Spain, we will highlight the separation and valorisation of 48 tons of mixed biological waste. ❤️ Our goal? To reduce a whopping 21 tons of annual CO₂ emissions during the demonstration phase. Together, we can make a difference! ♻️

MixMatters is an ambitious four-year project with a budget exceeding 7 million euros, co-financed by the [Circular Bio-based Europe Joint Undertaking \(CBE JU\)](#) under the European program for innovation and research 'Horizon Europe 2021-2027' (HE) under grant agreement N° 101112409.

CBE Stakeholder Forum 2023

MixMatters recently participated in the CBE JU Stakeholder Forum 2023 in Brussels, a pivotal event focused on advancing the circular bio-based sector in Europe. This significant event provided a platform for industry experts and innovators to explore into key themes critical to the sector's progression.

The forum's focal points included strategies for stimulating demand for circular bio-based solutions, exploring avenues to boost investments, and ensuring sustained Research and Innovation (R&I) leadership. These discussions not only addressed the

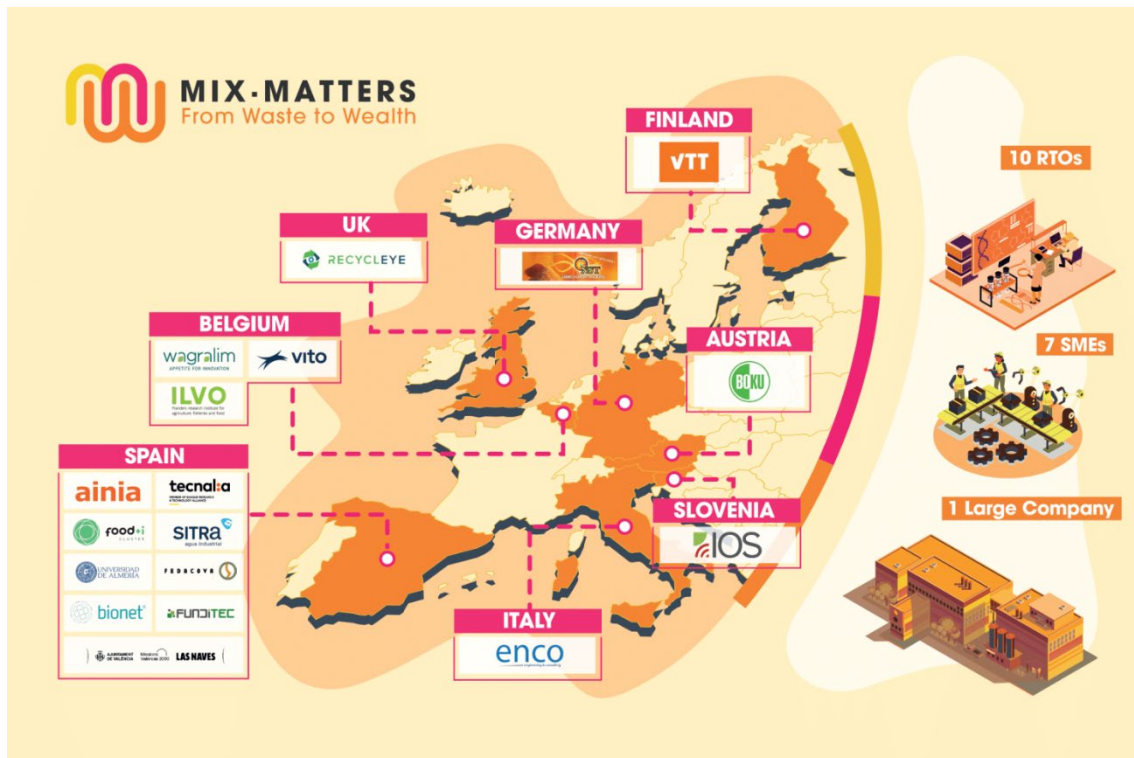

immediate challenges but also contemplated the industry's trajectory over the next three decades, identifying emerging technologies vital for global competitiveness.

A notable highlight was the exhibition, where innovative bio-based solutions developed by CBE JU-funded projects took centre stage. This showcase not only celebrated existing achievements but also provided inspiration for future efforts in the field of bio-based solutions.

In summary, MixMatters acknowledges the CBE JU Stakeholder Forum 2023 as a pivotal event that not only offered valuable insights but also fostered collaboration and networking opportunities. The diverse range of activities and discussions have undoubtedly contributed to shaping the trajectory of the circular bio-based sector in Europe.

MixMatters Consortium

The consortium, led by [AINIA](#), comprises 18 entities from 8 different countries: Spain, Germany, Belgium, Finland, Austria, Italy, United Kingdom, and Slovenia, bringing together innovative companies, business clusters, developers of innovative technology, and market experts.
